EDUCATION

University of Embu

Bachelor of Science in Computer Science

Sep. 2022 – Sep. 2026
Embu, Kenya

St. Peter's Moi's Bridge Secondary School

Kenya Certificate of Secondary Education – B-

Jan. 2018 – Apr. 2022
Kakamega, Kenya

Namunyiri Primary School

Kenya Certificate of Primary Education – 286 Marks

Feb. 2009 – Nov. 2017
Kakamega, Kenya

RELEVANT COURSEWORK

Introduction to Programming | Data Structures and Algorithms | Object-Oriented Programming | Database Systems | Computer Networks | Operating Systems | Web Programming and Applications | Computer Network Security | Artificial Intelligence | Machine Learning | ICT Project Management | Network and Distributed Programming | Software Engineering

EXPERIENCE

University of Embu – ICT Department

ICT Attaché

May 2025 – August 2025
Embu, Kenya

- Configured and maintained network systems to ensure reliable campus connectivity.
- Performed OS installation, driver setup, configuration, and security patching to ensure hardware and software compatibility.
- Managed Windows updates to keep systems up-to-date and secure across the department.
- Provided technical support for staff and students including email recoveries, password resets, and portal issue resolution.
- Maintained software systems and supported infrastructure troubleshooting to ensure smooth ICT operations.
- Supervised computer labs, oversaw proper functioning of equipment, and assisted students with technical queries.
- Commended by Head of ICT (Maurice Murimi Micheni) for exceptional diligence, responsibility, and technical capability.

PROJECTS

Potato Early Blight Detection System | Python, TensorFlow, OpenCV [Test the application](#) → January 2026

- Developed a machine learning model to detect early blight from potato leaf images.
- Used computer vision techniques for image preprocessing and feature extraction.
- Trained and tested models to improve early disease detection accuracy.
- Designed the system to help smallholder farmers reduce crop losses.

AI Voice Guardian | AI, Speech Processing, Real-Time Audio Analysis [View on GitHub](#) → November 2025

- Designed an AI-powered system to detect verbal harassment during live audio conversations.
- Implemented real-time speech-to-text processing for accurate content analysis.
- Built models to identify harassment, threats, hate speech, and bullying.
- Applied severity scoring to classify incidents as low, medium, or high risk.
- Enabled automatic muting of severe offenders to stop abuse instantly.

Short-Form Video Virality Predictor | Python, Streamlit, Machine Learning [View on GitHub](#) → Sept 2025

- Developed a Streamlit-based machine learning app to predict short-form video performance trends.
- Classified videos as Rising, Declining, Seasonal, or Stable using engagement metrics.
- Used video metadata such as views, likes, comments, and shares for prediction.

- Implemented URL-based analysis to auto-fetch data from TikTok and YouTube Shorts.
- Added manual input mode for custom data entry when auto-fetch is unavailable.
- Displayed model confidence scores and debugging outputs for transparency.

Digital Attendance Management System | Python, Flask, MySQL [View on GitHub →](#) January 2023

- Designed a secure web application for managing event attendance records.
- Implemented user authentication and attendance tracking features.
- Improved accuracy and efficiency compared to manual attendance methods.

Personal Portfolio Website | HTML, CSS, JavaScript [View on GitHub →](#) April 2024

- Designed and developed a personal portfolio website to showcase projects, skills, and achievements.
- Built responsive layouts for mobile and desktop devices.
- Optimized site structure for performance and clear navigation.

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, HTML, CSS, SQL

Developer Tools: Git, Docker, VMware, VS Code, Streamlit, Jupyter Notebook

Technologies & Frameworks: Flask, TensorFlow, OpenCV, scikit-learn, MySQL, MongoDB, Linux, AWS (basic)

AI Tools: ChatGPT, GitHub Copilot, OpenAI API, Hugging Face, Google Colab, Kaggle, TensorFlow Hub, JupyterLab, Claude (Anthropic), LangChain, Google Vertex AI, Gamma AI, Weights & Biases

PROFESSIONAL TRAINING & CERTIFICATIONS

Power Learn Project (PLP) Feb. 2025 – Jul. 2025

Software Development Program – Specialization: AI for Software Engineering, Python, Web Technologies, Databases, Startup Building, Employability Skills

HP LIFE

Introduction to Cybersecurity Awareness; Data Science & Analytics

Cisco Networking Academy

Introduction to Cybersecurity; Networking Basics

Cisco

Cisco Certified Networking Associate (CCNA) – In Progress (Expected: Dec. 2026)

Cisco

Junior Cybersecurity Analyst – In Progress (Expected: Dec. 2026)

IBM

Artificial Intelligence (AI) | Cybersecurity | Cloud Computing | Data Analytics

LEADERSHIP & COMMUNITY ENGAGEMENT

- Led a 10-member student team in a community-based tech project.
- Volunteered in local clean-up and tree-planting initiatives.
- Volunteered as a Protocol Officer during the University of Embu Career Week, supporting event coordination and guest management.

ACHIEVEMENTS

- Winner – Mozilla Responsible Computing Challenge 2024
- Recognized by the University of Embu ICT Department for exemplary performance during industrial attachment.

REFEREES

Available upon request.
